

the procedure was short simple

they inserted two black **soft pouches** filled with air, one under each armpit.

nestled under her thin white-blue skin, **eggs** in **sacs**.

in order to **elicit** the coloured-scent response, one had to slip and slide fingers over the moist sweaty surfaces of her underarms.

pressed correctly the keys produced a **caleidoscope** of responses

each keystroke is a breath, a **gasp**, a colour, a death

each keystroke is a **breath**, a gasp, a scent, a **shudder**
